Ex:
#include <iostream>
using namespace std;

int main()
{
    float a;
    int b;
    cout<<"Please enter 2 integers "<<endl;
    cin>>a>>b;
    int sum=a+b;
    int subs=a-b;
    int mult=a*b;
    int div=a/b;

    cout<<"Sum of the number a and b is "<<sum<<endl;
    cout<<"Difference of the number a and b is "<<subs<<endl;
    cout<<"Multiplication of the number a and b is "<<mult<<endl;
    cout<<"Division of the number a and b is "<<div<<endl;
    return 0;
}

Ex:
#include <iostream>
using namespace std;

int main()
```cpp
{

    char symbol1, symbol2, symbol3;
    cout<<"Please enter 2 initials "<<endl;
    cin>>symbol1>>symbol2;
    symbol3=' ';
    cout<<symbol1<<symbol3<<symbol2;
    return 0;
}
```
